

MOBILE POINT OF CARE SOLUTION

PROJECT OVERVIEW

National Healthcare Organization

Industry: Healthcare

Project: Mobile Point of Care Solution

Timeframe: 6 months

Parameters: Mobile Solution Across Enterprise

Size of Project: Between \$500,000-\$1,000,000

Customer Business Requirement:

The need to standardize across their enterprise on a POC solution that meets the needs of both the care givers as well as IT led the Organization to Deerwood. Through a 3 month evaluation process of multiple devices in multiple facilities the search was narrowed to the top two devices. Deerwood worked directly with the EMR software providers to ensure compliance and regulatory needs were met. Upon final selection of the proper device a tight deadline for deployment across all locations was set in place. Through detailed project management and Deerwood's propriety procurement processes all expectations and timelines were exceeded.

The Deerwood Way:

As a long time trusted advisor for this client they knew they could lean on Deerwood to deploy the proper solution. With our vast array of manufacturer and EMR partnerships we can leverage the knowledge base of multiple resources to ensure all compliance and regulatory needs are met. With purchasing power in the tens of millions our clients can utilize Deerwood's buying power to keep a solid bottom line on enterprise size projects.
